

# Software Developer Case Studies

## BRIDGING THE TECHNOLOGY GAP WITH SOFTWARE DEVELOPMENT

ClearBridge delivers scalable and maintainable Application and Software Development services in support of our clients' most critical development needs. Leveraging years of experience, our Developer consultants help your organization build or enhance even the most complex of applications, across all major methodologies.

### SR SOFTWARE DEVELOPER

Our client, a government entity, asked ClearBridge for a Senior Software Developer to support their Agile development team.

ClearBridge provided a resource who developed in C++ and Java to develop code for a live mission system that is a critical contributor to our nation's security, and that of our allies. Our Developer participated in software implementation to include static code analysis, unit-level testing, documentation, and rapid software defect root cause analysis and solution development.

### FULL STACK WEB DEVELOPER

Our client, a major luxury goods retailer, asked ClearBridge for a Full Stack Web Developer.

ClearBridge provided a resource who was responsible for building dynamic applications to support the CRM, Marketing and Clienteling systems. Our Developer designed and built innovative solutions using JEE, Web UI, Salesforce, Hadoop, RDBMS, Informatica, and Mulesoft ESB, among other current technologies.

### .NET DEVELOPER

Our client, a global software company, asked ClearBridge for a .NET Developer.

ClearBridge provided a resource who worked on their Training Manager product that manages the training of the agents for their customers. Our Developer implemented enhancements and reworked the application to support multiple sites.

### SOFTWARE DEVELOPER

Our client, a large technology company, asked ClearBridge for a Software Developer to support Digital Transformation and Digital Infrastructure.

ClearBridge provided a resource who was responsible for providing technical expertise for implementation projects for Genesys Digital Channels Solutions suite (i.e. Genesys integrations with E-mail, Chat, Social Networks, Messengers, and other mobile and web-based channels). Our Developer worked mainly with front-end and web development such as HTML5, JavaScript, Ajax, Restful, SOAP, and more.

### PYTHON SOFTWARE DEVELOPER

Our client, a telecommunications company, asked ClearBridge for a Python Automation Software Developer to join their network infrastructure team.

ClearBridge provided a resource who was responsible for helping to engineer and develop new projects, including Python Automation Development for network config deployment and test plan execution, and Automated Inventory System for frontend UI Angular, React, VUE development on Single Page Applications along with REST API integration development.

### LEAD SOFTWARE ENGINEER

Our client, a behavioral screening and analysis company, asked ClearBridge for a Lead Software Engineer.

ClearBridge provided a resource who led an Agile team of Full-Stack Software Developers and played a critical role in the development and launch of new software. Our Engineer acted as an Individual Contributor while also mentoring / coaching others within the team.
